Forward-Looking Statements

This presentation includes forward-looking statements as defined under federal law. Although we believe that our expectations are based upon reasonable assumptions, we can give no assurance that our goals will be achieved. Actual results may vary materially. All statements, other than statements of historical facts, included in this press release that address activities, events or developments that we expect, believe or anticipate will or may occur in the future, including but not limited to statements relating to future financial and operating results and compliance with our senior secured credit facility covenants, the timing and anticipated benefits of the King's Quay, Argos, Shenandoah and Salamanca developments, our expectations regarding our Granger expansion, the expected performance of our other projects and business segments, and our strategy and plans, are forward-looking statements, and historical performance is not necessarily indicative of future performance.

Those forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties, factors and risks, many of which are outside our control, that could cause results to differ materially from those expected by management. Such risks and uncertainties include, but are not limited to, weather, political, economic and market conditions, including a decline in the price and market demand for products (which may be affected by the actions of OPEC and other oil exporting nations), impacts due to inflation, and a reduction in demand for our services resulting in impairments of our assets, the spread of disease (including Covid-19), the impact of international military conflicts (such as the conflict in Ukraine), the result of any economic recession or depression that has occurred or may occur in the future, construction and anticipated benefits of the SYNC pipeline and expansion of the capacity of the CHOPS system, the timing and success of business development efforts and other uncertainties. Those and other applicable uncertainties, factors and risks that may affect those forward-looking statements are described more fully in our Annual Report on Form 10-K filed with the Securities and Exchange Commission and other filings, including our Current Reports on Form 8-K and Quarterly Reports on Form 10-Q. We undertake no obligation to publicly update or revise any forward-looking statement.

This presentation may also include certain non-GAAP financial measures. Please refer to our earnings release for the most directly comparable GAAP financial measures and the reconciliations of non-GAAP financial measures to GAAP financial measures included at the end of this presentation.

Market Leading Businesses

Genesis Total LTM Segment Margin \$578 MM^(a)

Offshore Pipeline Transportation

- Practically irreplaceable integrated asset footprint focused on transporting crude oil produced from the deepwater Central Gulf of America to multiple onshore markets
- Contracts structured as life of lease dedications to individual platforms & pipelines, with newer generation contracts including some take-or-pay features
- Customer production profiles designed to produce for decades with low decline
- Uniquely positioned to capture additional volumes from incremental deepwater developments

Marine Transportation

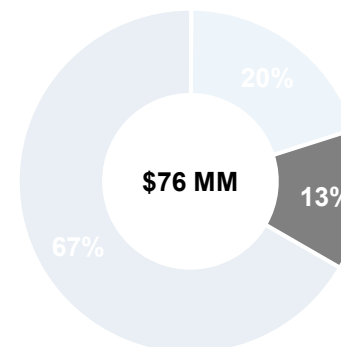

- Young, modern fleet of inland boats and heated barges with almost exclusive focus on intermediate refined products ("black oil")
- Nine ocean going barges / ATBs ranging in size from 65k – 135k bbls
- 330k bbl ocean going tanker American Phoenix built in 2012 under long-term contract with credit-worthy counterparty through mid-2027 at highest ever day rate under our ownership

Onshore Transportation & Services

- Integrated suite of refinery-centric onshore crude oil pipelines, terminals and related infrastructure and sulfur removal business inside the refinery fence
 - Leading 3rd party facilitator of feedstocks to ExxonMobil's Baton Rouge and Baytown refineries
- Certain onshore pipeline and terminal assets integrated with Genesis' Gulf of America crude oil pipeline infrastructure
- Leading refinery sulfur removal business with consistent cash flow profile; integrated logistical footprint and customer relationships across NaHS and caustic soda markets

Note: Pictures from top to bottom: Ship Shoal 332 A&B Platforms, inland push boat and barges on the Mississippi River and Texas City terminal & tank farm.

(a) LTM Segment Margin as of December 31, 2025.

Cash Flow Profile Poised to Deliver Increasing Returns to Stakeholders

Diverse Portfolio of Long-Lived, Market Leading Businesses with High Barriers to Entry and Significant Operating Leverage

Ample Liquidity Provides Significant Financial Flexibility

Expected Growth in Adjusted EBITDA^(a) and Minimal Growth CapEx Driving Increased Cash Flow^(b)

Attractive Current Yield with Future Earnings Growth

Positioned to Increase Return of Capital to Everyone in Capital Structure

(a) We are unable to provide a reconciliation of the forward-looking Adjusted EBITDA, a non-GAAP financial measure, to its most directly comparable GAAP financial measure because the information necessary for quantitative reconciliations of Adjusted EBITDA to its most directly comparable GAAP financial measure is not available to us without unreasonable efforts. The probable significance of providing the forward-looking Adjusted EBITDA without directly comparable GAAP financial measure is that such non-GAAP financial measure may be materially different from the corresponding GAAP financial measure.

(b) After certain cash obligations, including cash interest payments, preferred and existing common unit distributions, cash maintenance capital requirements, and cash taxes.

Offshore Ramping & Leading the Way; Long-Term Thesis Progressing

- **Long-term outlook and value proposition for Genesis remains in-tact**
 - Reported Adjusted EBITDA^(a) of \$157.8 million in the fourth quarter and \$544.3 million for the full year
- **Clear line of sight to Adjusted EBITDA^(a) growth and increasing amounts of cash flow^(b) and financial flexibility**
 - Volumes from Shenandoah exceeding minimum volume commitments; Salamanca on-line and continuing to ramp towards target production levels
 - Market conditions across both our brown-water and blue-water fleets stabilized in the 4th quarter
 - Expect to generate Adjusted EBITDA^(a) of plus or minus 15%-20% in 2026 over our normalized 2025 Adjusted EBITDA of \$500 - \$510 million^(c)
- **Capital allocation remains a core focus for management and the board**
 - Our approach continues to balance three clear priorities: strengthening the balance sheet, opportunistically addressing our high-cost corporate preferred securities, and thoughtfully and prudently growing distributions to common unitholders over time
 - Will exercise patience, discipline and balance to maintain sufficient financial flexibility, as well as liquidity, to evaluate any accretive incremental growth opportunities should they opportunistically emerge
- **Recently issued \$750 million of 6¾ unsecured notes due 2034; proceeds will be used to redeem 100% of 2028 notes and for general purposes**
 - Nearest unsecured maturity not until January 2029
- **Currently in the process of extending our senior secured credit facility for an additional 5 years until 2031; targeting \$900 million in commitments which will provide adequate liquidity and flexibility moving forward**
 - Includes increased flexibility in our financial covenants and an increase in our permitted investment and debt repurchase baskets
- **Quarterly distribution increased to \$0.18 per common unit in January 2026; represents a 9.1% increase over the distribution paid in 4Q24**
 - Board will continue to evaluate future distribution growth as we realize increasing Adjusted EBITDA^(a) and benefit from reduced cash obligations
- **Committed to maintaining adequate financial flexibility while not losing focus on our long-term leverage ratio^(d)**
 - Exited 4th quarter with leverage ratio^(d) of 5.1x; Improving the balance sheet and maintaining leverage ratio^(d) at or near 4.0x remains a top priority
 - Repurchased \$25 million of Class A convertible preferred securities in early February 2026 at par; to date repurchased \$350 million of Class A convertible preferred securities

(a) Adjusted EBITDA is a non-GAAP financial measure. We are unable to provide a reconciliation of the forward-looking Adjusted EBITDA projections contained in this presentation to its most directly comparable GAAP financial measure because the information necessary for quantitative reconciliations of Adjusted EBITDA to its most directly comparable GAAP financial measure is not available to us without unreasonable efforts. The probable significance of providing these forward-looking Adjusted EBITDA measures without directly comparable GAAP financial measures may be materially different from the corresponding GAAP financial measures.

(b) After certain cash obligations, including cash interest payments, preferred and existing common unit distributions, maintenance capital requirements, and cash taxes.

(c) Excludes two months of contribution from our former Alkali business in the first quarter and assumes 10 days of weather-related downtime for hurricane season in the third quarter 2025.

(d) As calculated under our senior secured credit facility.

Business Segment Detail

Overview

Offshore Pipeline Transportation – Overview

World Class Footprint in Leading North American Basin

Long-Term Value Creation

- ~2,300 miles of pipelines and associated platforms primarily located in the Central Gulf of America
- Leading independent midstream service provider uniquely positioned to provide deepwater producers maximum optionality with access to both Texas and Louisiana markets
 - No priority / dependency on affiliated equity production
- Focused on providing producers a “highway to shore” via our Cameron Highway Oil Pipeline System (“CHOPS”) and Poseidon Oil Pipeline (“Poseidon”)
 - Laterals and other associated infrastructure serve as feeder pipelines to CHOPS and Poseidon
- Provide transportation to shore for several of the most prolific fields in the central Gulf of America

CHOPS & Poseidon Volumes

Genesis Crude Oil Pipelines to Shore

	CHOPS	Poseidon	Eugene Island	Odyssey
Q4 2025 Avg. Daily Volume	~429 kbd	~282 kbd	NA	~69kbd
Delivery Point	Texas	Louisiana	Louisiana	Louisiana
Mileage	380	367	184	120
Ownership	64%	64%	29%	29%

(a) Additional 38k/d based on 28 days at an average of 490k/d to reflect hurricane downtime in 2020.
 (b) Per Energy Information Agency, WTI daily spot prices through December 31, 2025.

Track Record of Success in the Gulf of America

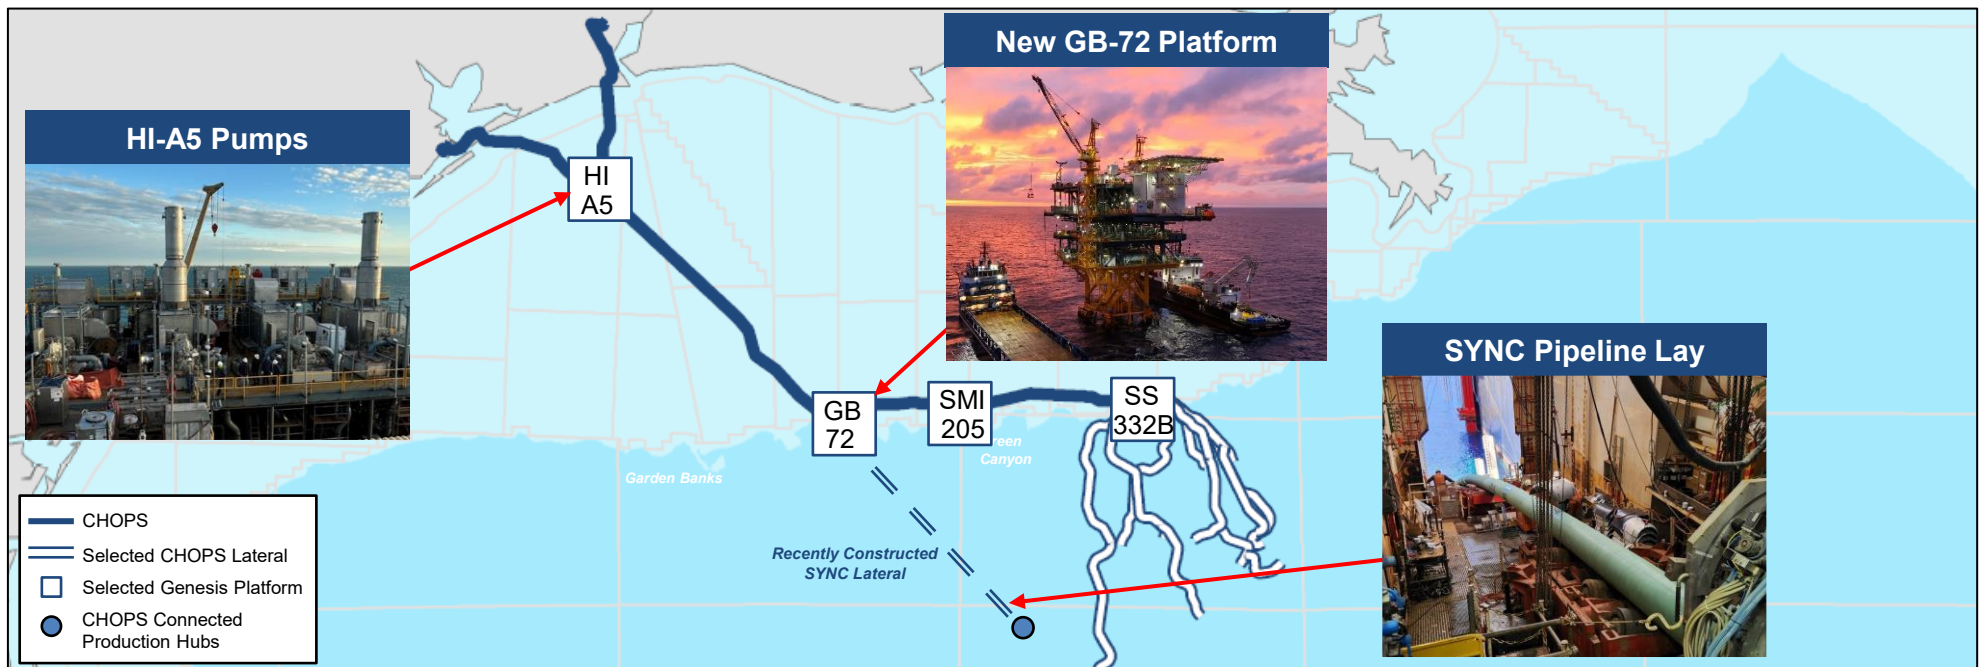

Driven by Strategic Acquisitions and Organic Growth

Offshore Expansion – Project Overview

Expanding Basin Critical Infrastructure in the Gulf of America

- On May 4th, 2022 Genesis announced it would expand its existing CHOPS system and construct a new 100% owned “SYNC” pipeline to support additional volumes in the central deepwater Gulf of America
 - Projects supported by life of lease dedications and take-or-pay agreements from multiple new sanctioned deepwater developments
- CHOPS system upgrades include:
 - Complete overhaul of the Garden Banks 72 platform (“GB-72”) topside facilities
 - Addition of pumps at both the High Island A5 (“HI-A5”) and GB-72 platforms to upgrade processing capabilities and increase throughput
- SYNC pipeline details include:
 - Extends approximately 105 miles from the GB-72 platform to the Shenandoah field in the Walker Ridge area of the Gulf of America
 - Pipeline installation completed in late 2023
 - 100% of oil production moving on the SYNC pipeline will flow through our 64% owned CHOPS system for further transportation to shore
- Project completed in mid-2025 in advance of first production from both Shenandoah and Salamanca

Offshore Expansion – New GB-72 Platform

Cornerstone of the CHOPS Expansion & SYNC Pipeline

- Genesis recently completed the construction of its new GB-72 platform in the Gulf of America
 - Serves as an integral booster station on the CHOPS pipeline to increase throughput capacity
 - Sole delivery point for the new SYNC pipeline that connects to the Shenandoah floating production unit
- GB-72 platform receives barrels from both the existing SS-332 platforms and the new SYNC pipeline
 - Critical junction for safe and responsible pipeline operations
 - Top operations deck sits ~150 feet above sea level

New GB-72 Platform

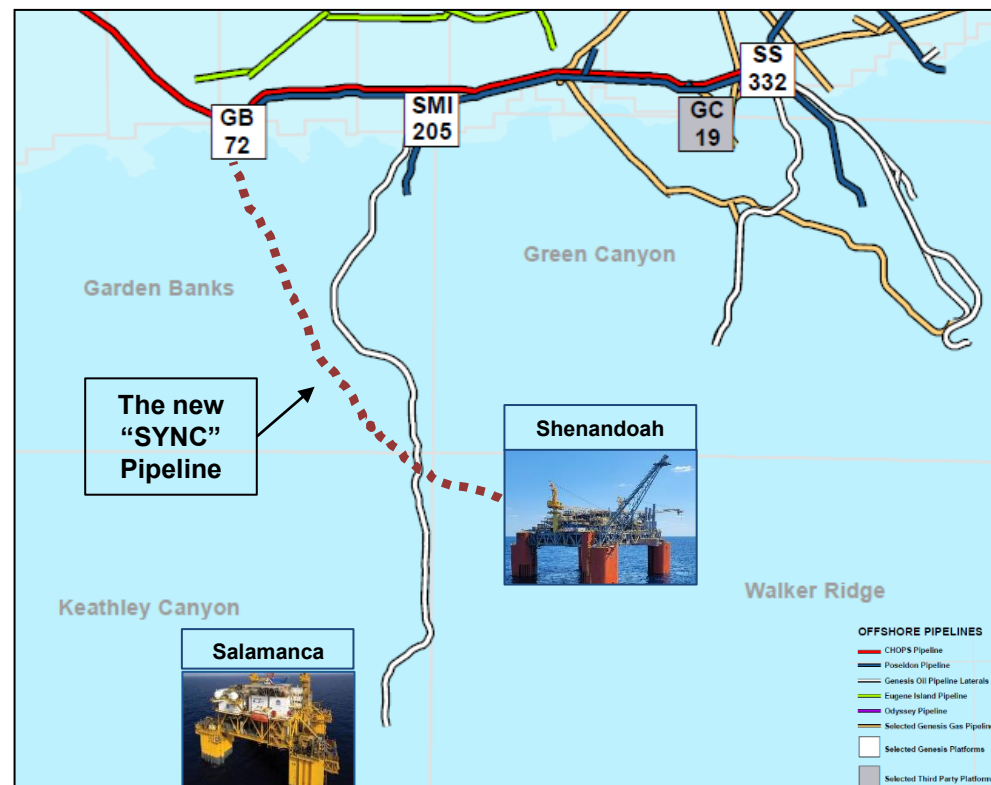

Offshore Expansion – Commercial Support

Supported by Credit Worthy Take-or-Pay Agreements and Life of Lease Dedications

- **Genesis entered into definitive agreements to provide downstream transportation services for two separate standalone deepwater upstream developments, Shenandoah and Salamanca**
 - When combined, the take-or-pay features (~65% of expected case) for both developments represent a mid-single digit build multiple^(a), which would be less if producers achieve their expected production profiles
 - Agreements for both developments included “life of lease” dedications and certain take-or-pay features
 - Each facility will serve as a host platform for any neighboring future developments and sub-sea tiebacks
- **Shenandoah FPU – Operated by BOE Exploration and Production**
 - Connected to our new 100% owned SYNC pipeline which delivers to our 64% owned CHOPS system for transportation to shore
 - Located in Walker Ridge blocks 51, 52 and 53 and will have an original production handling capacity of ~120,000 bbls/d^(b) with potential to expand up to ~140,000 bbls/d^(b)
 - First production achieved in July 2025
- **Salamanca FPS – Operated by LLOG**
 - Connected to our 100% owned SEKCO pipeline which delivers to our 64% owned Poseidon pipeline for transportation to shore
 - Located across multiple blocks in Keathley Canyon and will have production handling capacity of up to ~60,000 bbls/d^(b)
 - First production achieved in September 2025
 - Will serve as the collection point from the joint development of the Leon and Castile fields
 - Repurposes idled Independence Hub platform Genesis sold to LLOG in May 2022

New Dedicated Deepwater Developments

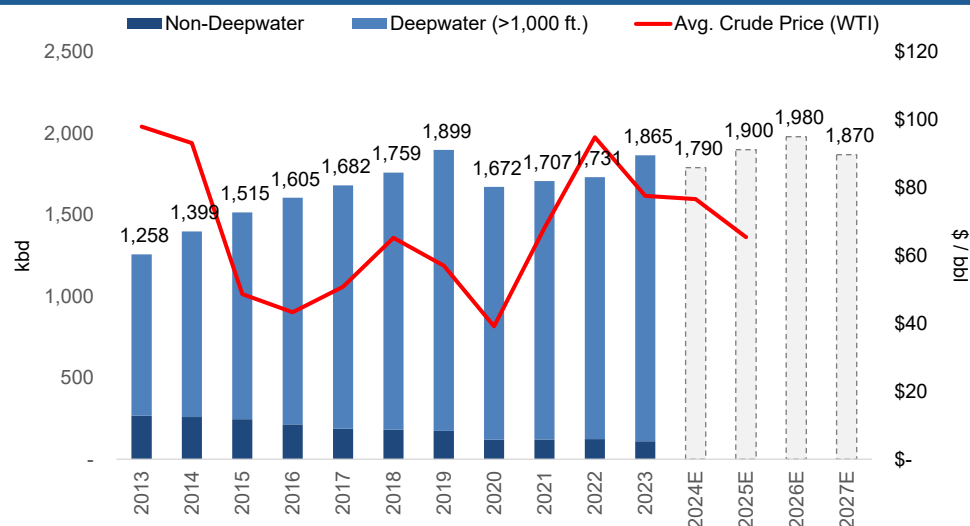

(a) Multiples assume no additional production or developments ever being tied into SYNC or CHOPS, which we believe is unlikely.
 (b) Platform capacity numbers are design capacity and subject to crude quality. Actual volumes may vary.

Gulf of America Crude Oil Production

Continued Growth in the Deepwater

- Deepwater Gulf of America crude oil production is projected to increase by ~89% from 2013 – 2027E
- Production increase has been primarily driven by producers' ability to leverage existing infrastructure, improved drilling efficiency and lower service costs
 - New discoveries within ~30 miles of existing platforms are often “tied back” given existing pipeline connectivity to shore
- 48 new fields have started producing since 2015
 - 33 of these fields are tiebacks to existing production facilities
- New developments and subsea tiebacks continue to drive increasing deepwater production

Gulf of America Crude Oil Production^(a)

Select Producer Commentary^(b)

“The Argos Southwest Extension project...kicks off a period of significant growth for bp in the Gulf of America, which will continue to play a critical role in delivering secure and reliable energy the world needs today and tomorrow.”

“Breakevens [in the Gulf of America] have come down a lot...We're now down in the teens and pushing to the low-teens on development costs...And so we've seen the breakevens there become very competitive, they had to because we had such good opportunities in other parts of our business.”

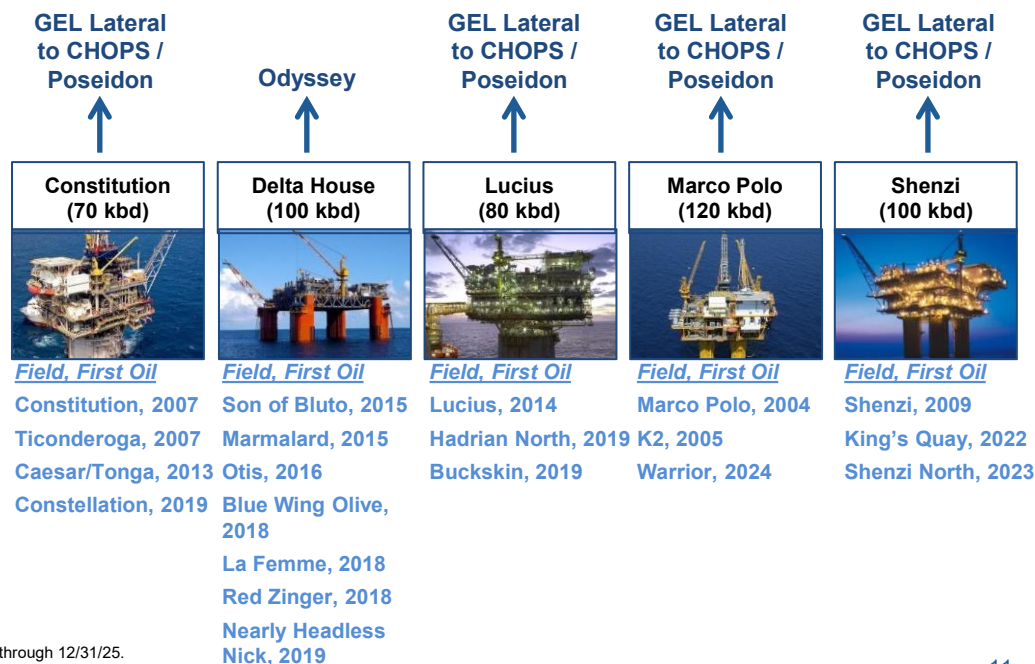

“I think what's important is the fact that we have breakeven projects in the \$30s to \$40s a barrel that allows us to have robustness against the current price environment that we see.”

“...the Khaleesi and Samurai wells were recently returned to production...These wells, because of their high production rates, are important cash flow generators and high rate-of-return investments. They also highlight the importance of the Gulf of America to the company's production assets.”

Select Platform & Field Development History^(c)

Note: All pipeline capacity subject to producer crude quality.

(a) Source: BSSE data and EIA's February 10, 2026 short term energy outlook; 2020 production factors in hurricane days. Crude prices through 12/31/25.

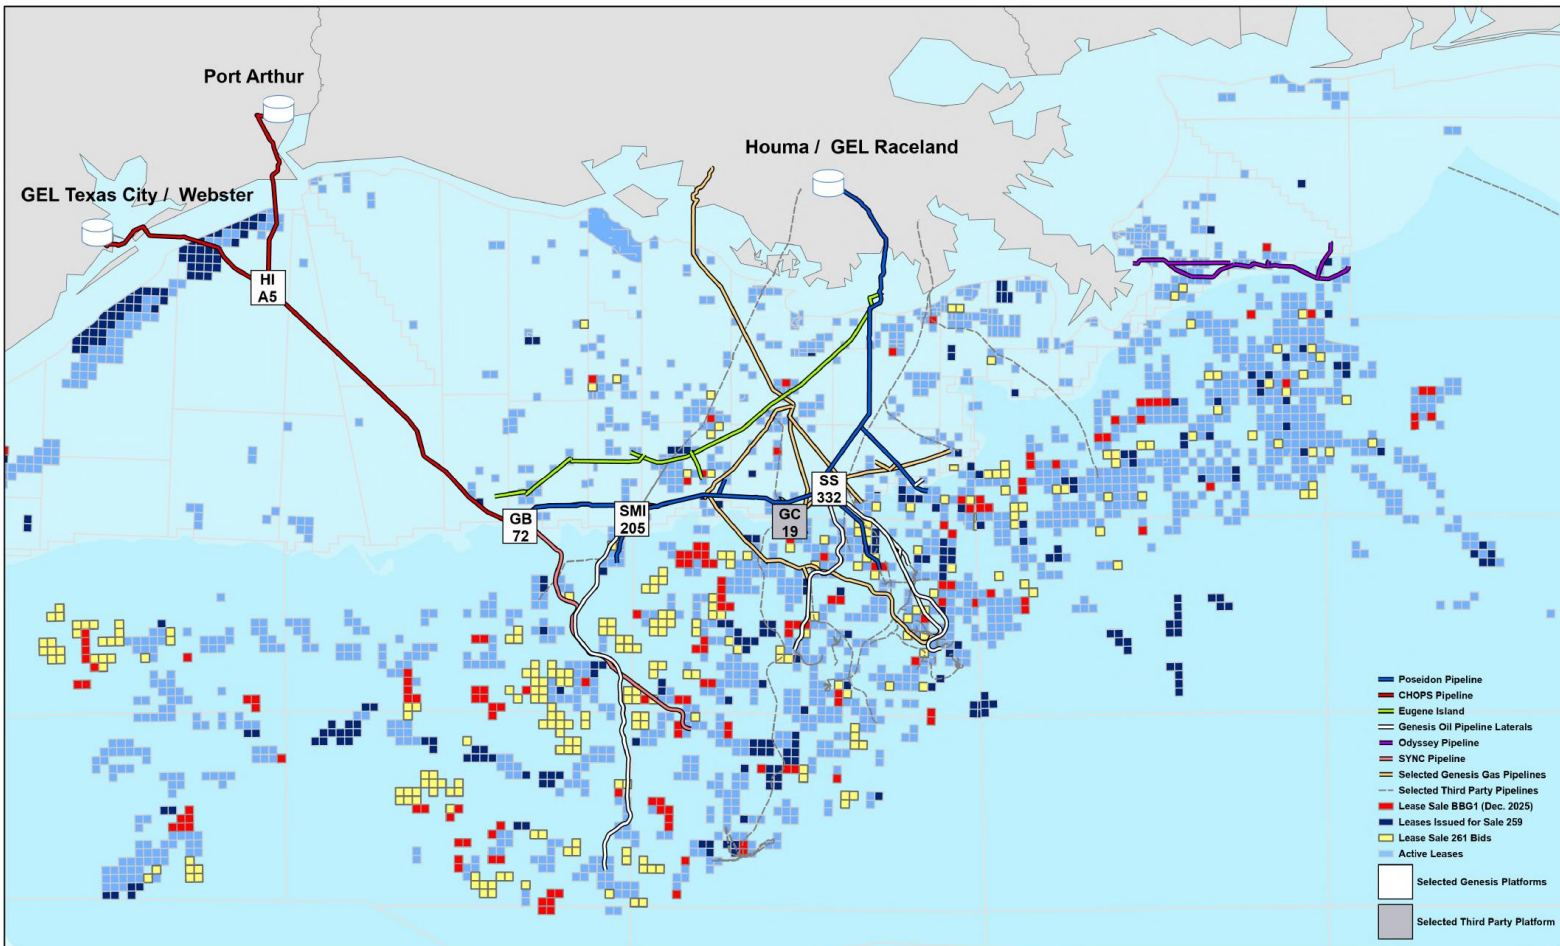

(b) BP commentary per 2Q 2025 earnings call. CVX commentary from 1Q 2025. Talos commentary from 1Q 2025. Murphy commentary per 2Q 2025 earnings call.

(c) Platform capacity numbers are design capacity and subject to crude quality. Actual volumes may vary.

Active Federal Leases in Gulf of America

Proximity to Existing Leases Creates Stability and Future Opportunity

- In April 2025, the Department of Interior and Bureau of Ocean Energy Management (BOEM) announced plans to develop the 11th National Outer Continental Shelf Oil and Gas leasing program
 - Will serve as the foundation for future lease sales in the Gulf of America
- Most recent lease sale activity in the vicinity of our existing asset footprint should provide stability and longevity for many years ahead
 - Lease Sale Big Beautiful Gulf 1 was held on December 10, 2025
 - Generated >\$300mm in high bids for 181 tracts covering ~1.0mm acres in federal waters of the Gulf of America; ~65% located in the Central GOM

Central Gulf of America Overview

Robust Inventory of Future Growth

Note: All pipeline capacity subject to producer crude quality.
 Note: Map not intended to be an exhaustive list of prospects.

Gulf of America – Lower Carbon Intensity

Regulatory Oversight Helps Drive Lower Carbon Footprint

Gulf of America Plays Leading Role^(a)

- Barrels produced from the Gulf of America are the least emissions intensive barrels, from reservoir to refinery, than any other barrel refined by Gulf Coast refineries (including shipping)
 - Competes favorably against all foreign imports
- The Gulf of America remains a critical producing basin for multiple super-major operators as they continue to push towards net zero emissions

Chevron EVP – Upstream – James Johnson: “The Gulf of Mexico has some of the lowest carbon intensity in the world. It’s about 6 kilograms per barrel produced, so on a world scale, on even our company scale, which is already top quartile, it’s right at the bottom end of that range. So, this is a great area to develop for future production and carbon efficiency”

Significant Regulatory Oversight^(b)

- The leasing and operations activities in the GOM are subject to the requirements of some 30 federal laws administered by numerous federal departments and agencies
- In addition to the Outer Continental Shelves Lands Act, other laws that may apply to OCS exploration, development, and production include, but are not limited to the:
 - National Environmental Policy Act (NEPA),
 - Clean Air Act
 - Endangered Species Act
 - Federal Water Pollution Control Act
 - Marine Mammal Protection Act
 - National Historic Preservation Act

Average Upstream Emission Intensity by Resource Theme (Including Methane)^(a)

Lowest Emissions Intensity

Highest Emissions Intensity

(a) Source: NOIA Report: GHG Emission Intensity of Crude Oil and Condensate Production, Dated May 8, 2023.

(b) Bureau of Ocean Energy Management (BOEM) “Oil and Gas Leasing on the Outer Continental Shelf”.

Note: Chevron comment per 2Q 2022 earnings transcript dated July 29, 2022.

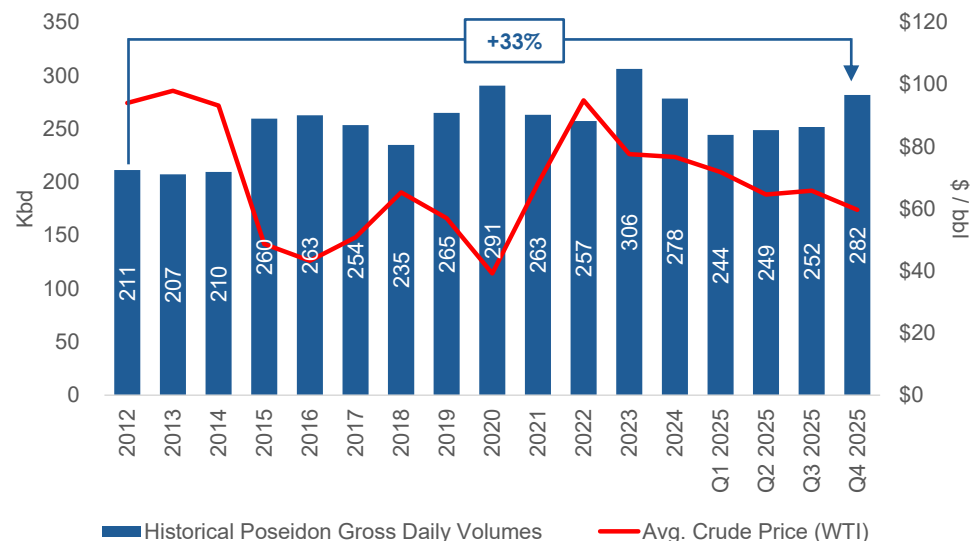

Note: All pipeline capacity subject to producer crude quality.

Case Study: Poseidon Oil Pipeline

Irreplaceable Crude Oil Pipeline in the Central Gulf of America

- **Poseidon Oil Pipeline is a basin critical pipeline that transports central Gulf of America production to key markets in Louisiana**
 - Integrated onshore with Genesis' Raceland, LA terminal for delivery to refining markets downstream
- **Pipeline has been in continuous operation for over 25 years with first oil in 1996 and a total gross PP&E to construct and maintain of \$466 million as of 12/31/25**
 - Distributed on average ~\$23 million per quarter to its owners over the last two years
- **Since 2012, volumes have increased ~33% across multiple commodity cycles**
- **Volumes on Poseidon include multiple recent developments:**
 - Salamanca (September 2025)
 - LLOG's Spruance discovery (June 2022)
 - 50% of Murphy's King's Quay volumes (April 2022)
 - LLOG's Buckskin prospect (June 2019)
- **Substantially all contracts include "life of lease" dedications for any field production for firm transportation to shore on Poseidon**
 - Newer generation contracts also include take-or-pay commitments

Steady Volumes Through Commodity Cycles

World Class Customers Base

Note: All pipeline capacity subject to producer crude quality.

Marine Transportation – Overview

Structural Industry Tailwinds Driving Momentum

- **Modern efficient fleet that is well positioned to benefit from steady demand and continued net retirements of Jones Act equipment**
 - Demand primarily driven by refinery utilization and crude differentials
 - Continued retirements and effectively no new construction reduces available capacity on the water
- **Business operates under day rate charters with largely fixed costs and a high degree of operating leverage**
 - Contract terms range from month-to-month to multi-year
 - American Phoenix currently operating under 3.5 year contract with credit-worth counterparty that runs through early-2027
 - Contract is highest day rate for the AP under our ownership
- **Inland barges are all asphalt capable, heated barges primarily utilized in black oil service (~95%)**

	Inland Fleet	Offshore Fleet	American Phoenix
Capacity	30-38 kbbl	65-135 kbbl	330 kbbl
Push Boats	33	9	-
Barges	78	9	-
Tankers	-	-	1

Inland Tank Barges by Age^(a)

Offshore Barges by Age^(b)

(a) Per industry research.

(b) Per industry & third-party sources as of November 2025. Includes tank barges with 75k-195k, <75k and >195,000 barrels of capacity.

Onshore Transportation & Services – Overview

Integrated Asset Footprint with Exposure to Significant Refinery Demand

Baton Rouge Complex	Texas City Terminal	Raceland Terminal	Sulfur Services (dba TDC)
<ul style="list-style-type: none"> Integral part of ExxonMobil's Baton Rouge refinery logistics and crude and intermediate products supply Baton Rouge terminal capable of loading and unloading crude oil and VGO Connectivity to deepwater import / export docks at Port of Baton Rouge Multiple fee "touch points" for Genesis across the integrated platform 	<ul style="list-style-type: none"> Connection to Genesis owned and operated CHOPS pipeline Destination point for various Gulf of America grades including CHOPS / HOOPS Current downstream pipeline delivery points include ExxonMobil's Baytown refinery (via Webster) Exploring additional downstream connectivity 	<ul style="list-style-type: none"> Connection to Genesis owned and operated Poseidon pipeline Downstream pipeline delivery point of St. James, LA via LOCAP provides connectivity to multiple South Louisiana refineries Direct pipeline connection to ExxonMobil's North Line with delivery point of XOM's Baton Rouge refinery 	<ul style="list-style-type: none"> Leading producer and marketer of sodium hydrosulfide or "NaHS" Own and/or operate 11 separate "sour gas processing" units inside the refinery fence <ul style="list-style-type: none"> Located in AR, LA, MS, OK, TX, UT & WV Downstream markets include copper mining, pulp & paper and other industrial applications in both North and South America

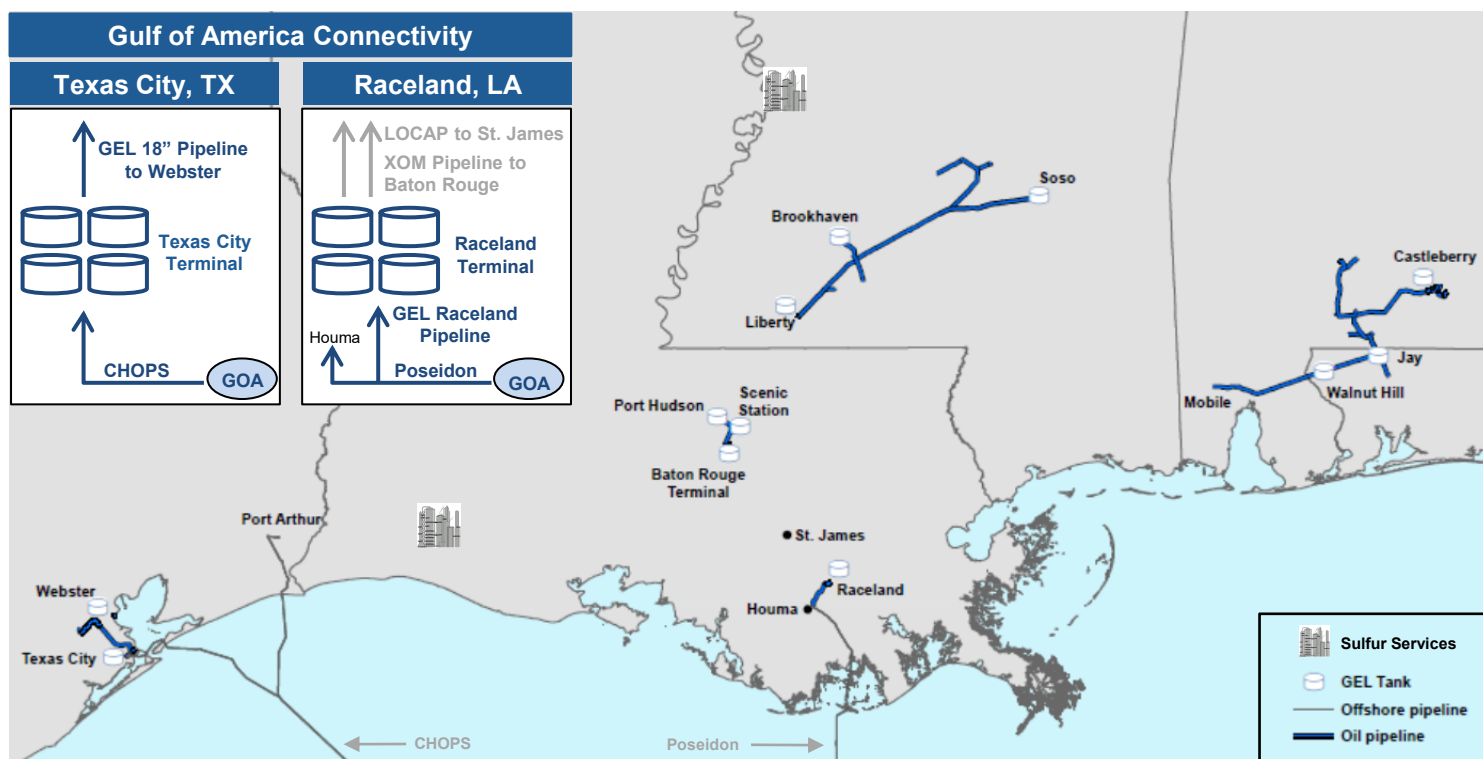

Scenic Station Terminal

Texas City Terminal

Raceland Terminal

Sulfur Services - Facilitating Lower Emissions

Market Leader of NaHS Production Helping Reduce Host Refinery Emissions

- **What do we do:**

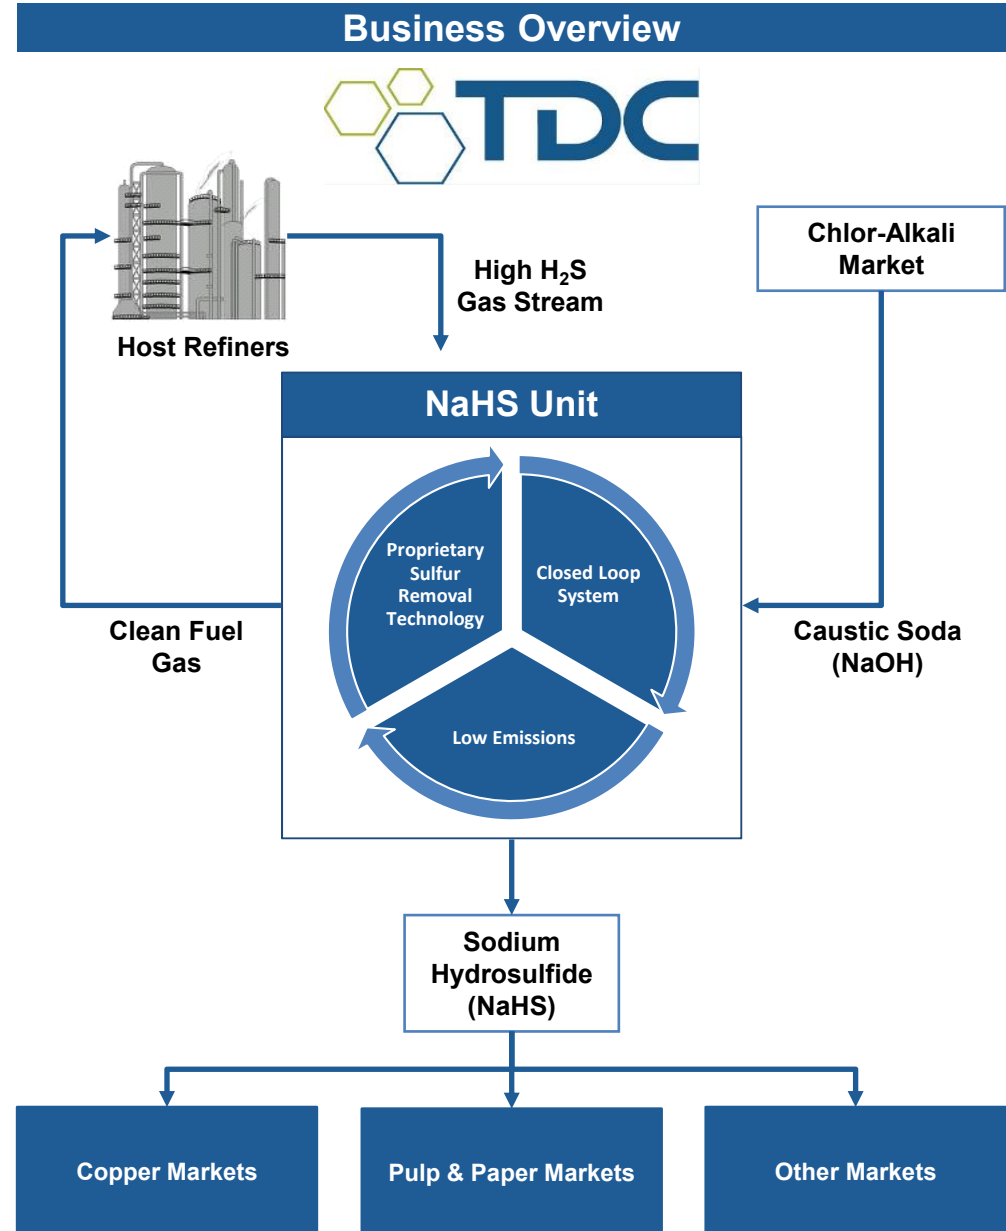

- Leading producer of sodium hydrosulfide (“NaHS”) via 11 “sour gas processing” units inside the refinery fence
 - Proprietary process includes reacting high hydrogen sulfide (“H₂S”) gas with Caustic Soda (“NaOH”)
 - Helping play integral role in sulfur removal for each refinery; running in parallel or in lieu of traditional sulfur removal units

- **How we make money:**

- Take sulfur in-kind as payment for sulfur removal services and sell NaHS volumes primarily to large copper mining (North & South America), pulp & paper and other customers
 - Large majority of contracted customers are indexed to the price of NaOH
- Sell additional NaOH volumes to refinery customers

- **Competitive advantages:**

- Market leading position and significant barriers to entry to replicate asset, logistical and marketing footprints
- Long-term relationships with both refineries and customers spanning 40+ years
- Consistent cash flow generation through economic cycles

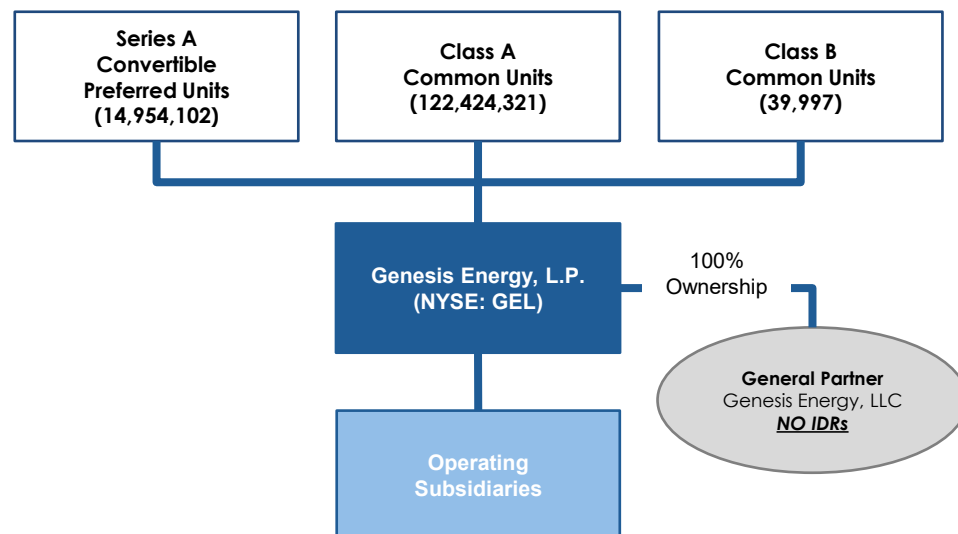

Appendix & Reconciliations

Debt and Preferred Equity Profile & Corporate Structure

Balance Sheet Overview

- Committed to long-term leverage ratio^(b) at or near 4.00x
- 4Q 2025 leverage ratio^(b) of 5.1x
- \$800 million senior secured credit facility
 - 17 participating banks
 - Maturity: September 2028
 - Maximum Leverage Ratio^(b): 5.50x
- In the process of extending our senior secured credit facility for 5 years until 2031
 - Targeting \$900 million in commitments
- No near-term maturities of unsecured notes until January 2029

Corporate Structure^(a)

Long-Term Debt Overview (\$MM)^(c)

■ Senior Notes □ Senior Secured Credit Facility

Preferred Equity Overview

Series A Convertible Preferred Units

- Issuance Price: \$33.71 per unit
- Outstanding Balance: ~\$504 million^(a)
- Repurchased to Date: \$350 million
- Annual Distribution Rate: 11.24%
- Maturity: Perpetual; no put rights

(a) Number of preferred units and outstanding balance assumed at par as of December 31, 2025, pro forma for most recent purchase of preferred units in February 2026.

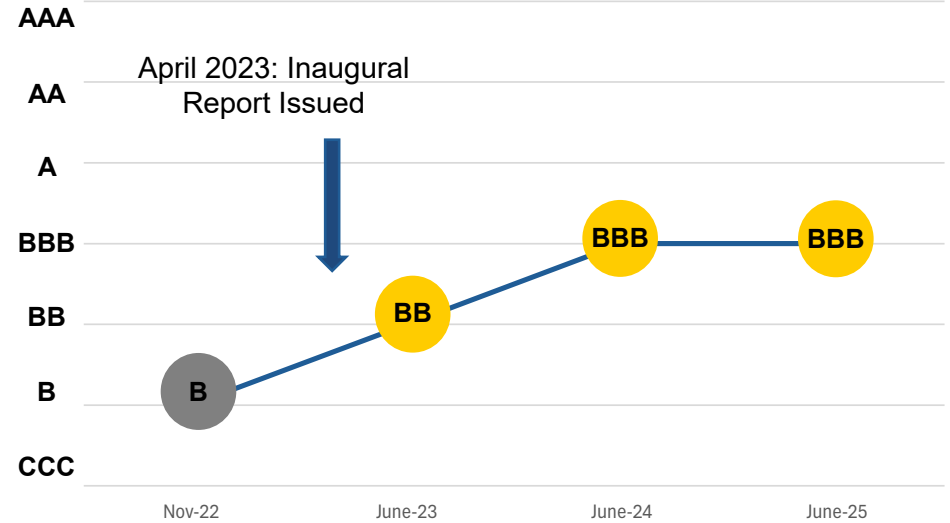

(b) As calculated under our senior secured credit facility.

(c) Pro-Forma for new 2034 unsecured notes; credit facility balance as of 12/31/25.

Supporting Business Priorities & Our Investors Through Sustainability

- Genesis is committed to operating its business in a responsible and sustainable manner
- Released 2024 Sustainability Report on October 30, 2025
- Sale of soda ash business in February 2025 significantly reduced our emissions footprint
 - Between 2020 - 2023 Scope 1 & Scope 2 emissions without soda ash would have been lower by an avg. of ~90% & ~96%, respectively
- Understanding and monitoring sustainability metrics is central to our long-term strategy
- Board and executive management engaged in review of sustainability program and implementation
 - Connected executive and key employee compensation to sustainability performance metrics
- Long history of environmental stewardship combined with safe and reliable operations

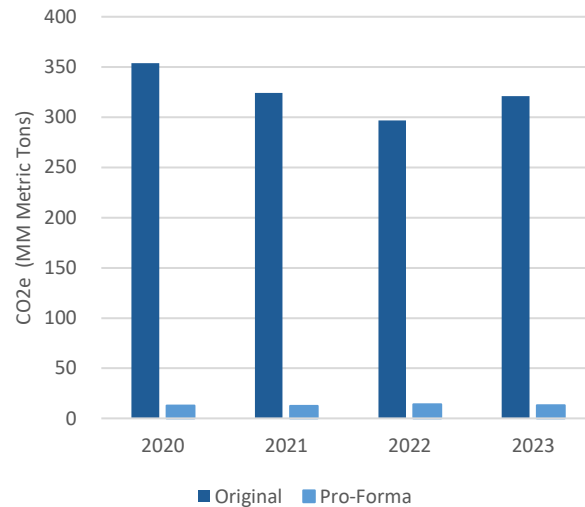

MSCI Ratings History

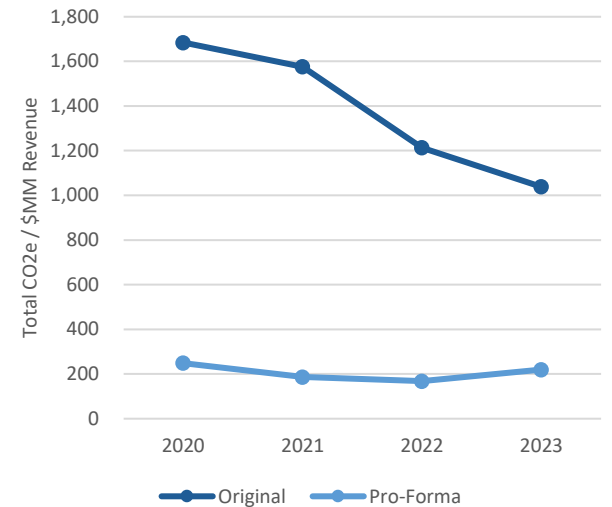

Scope 1 Emissions

Scope 2 Emissions

Emissions Intensity

Note: Original emissions numbers as reported in Genesis previous sustainability reports. Pro-forma emissions numbers exclude legacy soda ash business that was sold on February 28, 2025.

Balance Sheet & Credit Profile

Leverage Ratio & Common Unit Distribution Coverage Ratio

(\$ in 000s)	12/31/2025
Senior secured credit facility	\$6,400
Senior unsecured notes, net of debt issuance costs and discount	3,040,415
Less: Outstanding inventory financing sublimit borrowings	(28,100)
Less: Cash and cash equivalents	(6,318)
Adjusted Debt^(a)	\$3,012,397
	Pro Forma LTM
	12/31/2025
Consolidated EBITDA (per our senior secured credit facility)	\$544,324
Consolidated EBITDA Adjustments ^(b)	43,773
Adjusted Consolidated EBITDA (per our senior secured credit facility)^(c)	\$588,097
Adjusted Debt / Adjusted Consolidated EBITDA	5.12x
	Q4 2025
Q4 2025 Reported Available Cash Before Reserves	\$61,065
Q4 2025 Common Unit Distributions	22,044
Common Unit Distribution Coverage Ratio	2.77x

(a) We define Adjusted Debt as the amounts outstanding under our senior secured credit facility and senior unsecured notes (including any unamortized discounts or issuance costs) less the amount outstanding under our inventory financing sublimit, and less cash and cash equivalents on hand at the end of the period from our restricted subsidiaries.

(b) This amount reflects adjustments we are permitted to make under our senior secured credit facility for purposes of calculating compliance with our leverage ratio. It includes a pro rata portion of projected future annual EBITDA associated with contractual minimum cash commitments we expect to receive from material organic growth projects that are in-service. Additionally, it includes the pro forma adjustments to Adjusted Consolidated EBITDA (using historical amounts in the test period) associated with the sale of the Alkali Business. These adjustments may not be indicative of future results.

(c) Adjusted Consolidated EBITDA for the four-quarter period ending with the most recent quarter, as calculated under our senior secured credit facility.

Interest expense and income tax expense from discontinued operations	(4,195)	-	-	-	(4,195)
Available Cash before Reserves^(f)	\$20,347	\$32,227	\$35,482	\$61,065	\$149,121
Common Unit Distributions	\$20,207	\$20,207	\$20,207	\$22,044	\$82,665
Common Unit Distribution Coverage Ratio	1.01x	1.59x	1.76x	2.77x	1.80x

(a) Includes non-cash items such as depreciation, depletion and amortization and unrealized gains or losses on derivative transactions, amongst other non-cash items attributable to discontinued operations.

(b) Refer to additional detail of Select Items in our 4Q 2025 earnings press release and Form 10-K.

(c) See definition of Adjusted EBITDA in our 4Q 2025 earnings press release.

(d) Maintenance capital expenditures for the 2025 Quarter and 2024 Quarter were \$17.6 million and \$20.8 million, respectively, which excludes maintenance capital expenditures of \$23.4 million for the 2024 Quarter associated with the Alkali Business that was sold on February 28, 2025. Maintenance capital expenditures for the years ended December 31, 2025 and 2024, were \$71.5 million and \$94.6 million, respectively, which excludes maintenance capital expenditures of \$4.6 million and \$78.3 million for the years ended December 31, 2025 and 2024, respectively, associated with the Alkali Business. Our continuing maintenance capital expenditures are principally associated with our marine transportation business.

(e) Distributions to preferred unitholders attributable to the 2025 Quarter were paid on February 13, 2026 to unitholders of record at close of business on January 30, 2026.

(f) Represents the Available Cash before Reserves to common unitholders.

Adjusted Debt & Adjusted Consolidated EBITDA

(\$ in 000s)

	2025	2024
Long-term debt		
Senior secured credit facility	\$6,400	\$291,000
Senior unsecured notes, net of debt issuance costs, discount and premium	3,040,415	3,436,860
Less: Outstanding inventory financing sublimit borrowings	(28,100)	(12,200)
Less: Cash and cash equivalents	(6,318)	(10,371)
Adjusted Debt^(a)	\$3,012,397	\$3,705,289
Consolidated EBITDA (per our senior secured credit facility)	\$544,324	\$586,972
Consolidated EBITDA Adjustments ^(b)	43,773	117,394
Adjusted Consolidated EBITDA (per our senior secured credit facility)^(c)	\$588,097	\$704,366
Adjusted Debt-to-Adjusted Consolidated EBITDA	5.12x	5.26x

(a) We define Adjusted Debt as the amounts outstanding under our senior secured credit facility and senior unsecured notes (including any unamortized premiums, discounts or issuance costs) less the amount outstanding under our inventory financing sublimit, and less cash and cash equivalents on hand at the end of the period from our restricted subsidiaries.

(b) This amount reflects adjustments we are permitted to make under our senior secured credit facility for purposes of calculating compliance with our leverage ratio. It includes a pro rata portion of projected future annual EBITDA associated with contractual minimum cash commitments we expect to receive from material organic growth projects that are in-service. For any material organic growth project not yet completed or in-service, the EBITDA Adjustment is calculated based on the percentage of capital expenditures incurred to date relative to the expected budget multiplied by the total annual contractual minimum cash commitments we expect to receive as a result of the project. Additionally, it includes the pro forma adjustments to Adjusted Consolidated EBITDA (using historical amounts in the test period) associated with the sale of the Alkali Business. These adjustments may not be indicative of future results.

(c) Adjusted Consolidated EBITDA for the four-quarter period ending with the most recent quarter, as calculated under our senior secured credit facility.

Total Select Items, net^(d)	\$19,589	\$3,195	(\$3,656)	\$4,709	\$23,837

(a) Includes the difference in timing of cash receipts from or billings to customers during the period and the revenue we recognize in accordance with GAAP on our related contracts. For purposes of our non-GAAP measures, we add those amounts in the period of payment and deduct them in the period in which GAAP recognizes them.

(b) Represents the net effect of adding distributions from equity investees and deducting earnings of equity investees net to us.

(c) Represents Select Items applicable to all Non-GAAP measures.

(d) Represents Select Items applicable to Adjusted EBITDA and Available Cash before Reserves.
