Washington, D.C. 20549

# FORM 8-K

## CURRENT REPORT

PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934

Date of Report (Date of earliest event reported): February 17, 2022

# GENESIS ENERGY, L.P.

(Exact name of registrant as specified in its charter)

**Delaware**  
(State or other jurisdiction of  
incorporation or organization)

**1-12295**  
(Commission File Number)

**76-0513049**  
(I.R.S. Employer Identification No.)

**919 Milam, Suite 2100, Houston, Texas**  
(Address of principal executive offices)

**77002**  
(Zip Code)

**(713) 860-2500**  
(Registrant's telephone number, including area code)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240-14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240-14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240-13e-4(c))

### Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Trading Symbol(s)</u>	<u>Name of Each Exchange on Which Registered</u>
Common Units	GEL	NYSE

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

- Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

## **Item 2.02. Results of Operations and Financial Condition**

We issued a press release on February 17, 2022 regarding our financial results for the quarter ended December 31, 2021, and will hold a webcast conference call discussing those results on February 17, 2022 at 9:00 a.m. Central time (10:00 a.m. Eastern time). A copy of this earnings press release is furnished as Exhibit 99.1 to this report. The webcast conference call will be available for replay on our website at [www.genesisenergy.com](http://www.genesisenergy.com) for 30 days. A summary of this conference call is archived on our website.

As provided in General Instruction B.2 to Form 8-K, the information furnished in this Item 2.02 and in Exhibit 99.1 hereto shall not be deemed “filed” for purposes of Section 18 of the Securities and Exchange Act of 1934, as amended, nor shall it be deemed incorporated by reference in any filing with the Securities and Exchange Commission, except as shall be expressly provided by specific reference in such filing.

### **Use of Non-GAAP Financial Measures**

#### **Overview**

This press release and the accompanying schedules include non-generally accepted accounting principle (non-GAAP) financial measures of Adjusted EBITDA and total Available Cash before Reserves. In this press release, we also present total Segment Margin as if it were a non-GAAP measure. Our Non-GAAP measures may not be comparable to similarly titled measures of other companies because such measures may include or exclude other specified items. The accompanying schedules provide reconciliations of these non-GAAP financial measures to their most directly comparable financial measures calculated in accordance with generally accepted accounting principles in the United States of America (GAAP). Our non-GAAP financial measures should not be considered (i) as alternatives to GAAP measures of liquidity or financial performance or (ii) as being singularly important in any particular context; they should be considered in a broad context with other quantitative and qualitative information. Our Available Cash before Reserves, Adjusted EBITDA and total Segment Margin measures are just three of the relevant data points considered from time to time.

When evaluating our performance and making decisions regarding our future direction and actions (including making discretionary payments, such as quarterly distributions) our board of directors and management team have access to a wide range of historical and forecasted qualitative and quantitative information, such as our financial statements; operational information; various non-GAAP measures; internal forecasts; credit metrics; analyst opinions; performance, liquidity and similar measures; income; cash flow; and expectations for us, and certain information regarding some of our peers. Additionally, our board of directors and management team analyze, and place different weight on, various factors from time to time. We believe that investors benefit from having access to the same financial measures being utilized by management, lenders, analysts and other market participants. We attempt to provide adequate information to allow each individual investor and other external user to reach her/his own conclusions regarding our actions without providing so much information as to overwhelm or confuse such investor or other external user.

#### ***Available Cash before Reserves***

##### ***Purposes, Uses and Definition***

Available Cash before Reserves, also referred to as distributable cash flow, is a quantitative standard used throughout the investment community with respect to publicly traded partnerships and is commonly used as a supplemental financial measure by management and by external users of financial statements such as investors, commercial banks, research analysts and rating agencies, to aid in assessing, among other things:

- (1) the financial performance of our assets;
- (2) our operating performance;
- (3) the viability of potential projects, including our cash and overall return on alternative capital investments as compared to those of other companies in the midstream energy industry;

- (4) the ability of our assets to generate cash sufficient to satisfy certain non-discretionary cash requirements, including interest payments and certain maintenance capital requirements; and
- (5) our ability to make certain discretionary payments, such as distributions on our preferred and common units, growth capital expenditures, certain maintenance capital expenditures and early payments of indebtedness.

We define Available Cash before Reserves (“Available Cash before Reserves”) as Adjusted EBITDA as adjusted for certain items, the most significant of which in the relevant reporting periods have been the sum of maintenance capital utilized, net cash interest expense, cash tax expense, and cash distributions paid to our Class A convertible preferred unitholders.

#### *Disclosure Format Relating to Maintenance Capital*

We use a modified format relating to maintenance capital requirements because our maintenance capital expenditures vary materially in nature (discretionary vs. non-discretionary), timing and amount from time to time. We believe that, without such modified disclosure, such changes in our maintenance capital expenditures could be confusing and potentially misleading to users of our financial information, particularly in the context of the nature and purposes of our Available Cash before Reserves measure. Our modified disclosure format provides those users with information in the form of our maintenance capital utilized measure (which we deduct to arrive at Available Cash before Reserves). Our maintenance capital utilized measure constitutes a proxy for non-discretionary maintenance capital expenditures and it takes into consideration the relationship among maintenance capital expenditures, operating expenses and depreciation from period to period.

#### *Maintenance Capital Requirements*

##### **Maintenance Capital Expenditures**

Maintenance capital expenditures are capitalized costs that are necessary to maintain the service capability of our existing assets, including the replacement of any system component or equipment which is worn out or obsolete. Maintenance capital expenditures can be discretionary or non-discretionary, depending on the facts and circumstances.

Initially, substantially all of our maintenance capital expenditures were (a) related to our pipeline assets and similar infrastructure, (b) non-discretionary in nature and (c) immaterial in amount as compared to our Available Cash before Reserves measure. Those historical expenditures were non-discretionary (or mandatory) in nature because we had very little (if any) discretion as to whether or when we incurred them. We had to incur them in order to continue to operate the related pipelines in a safe and reliable manner and consistently with past practices. If we had not made those expenditures, we would not have been able to continue to operate all or portions of those pipelines, which would not have been economically feasible. An example of a non-discretionary (or mandatory) maintenance capital expenditure would be replacing a segment of an old pipeline because one can no longer operate that pipeline safely, legally and/or economically in the absence of such replacement.

As we exist today, a substantial amount of our maintenance capital expenditures from time to time will be (a) related to our assets other than pipelines, such as our marine vessels, trucks and similar assets, (b) discretionary in nature and (c) potentially material in amount as compared to our Available Cash before Reserves measure. Those expenditures will be discretionary (or non-mandatory) in nature because we will have significant discretion as to whether or when we incur them. We will not be forced to incur them in order to continue to operate the related assets in a safe and reliable manner. If we chose not to make those expenditures, we would be able to continue to operate those assets economically, although in lieu of maintenance capital expenditures, we would incur increased operating expenses, including maintenance expenses. An example of a discretionary (or non-mandatory) maintenance capital expenditure would be replacing an older marine vessel with a new marine vessel with substantially similar specifications, even though one could continue to economically operate the older vessel in spite of its increasing maintenance and other operating expenses.

In summary, as we continue to expand certain non-pipeline portions of our business, we are experiencing changes in the nature (discretionary vs. non-discretionary), timing and amount of our maintenance capital expenditures that merit a more detailed review and analysis than was required historically. Management’s recently increasing ability to determine if and when to incur certain maintenance capital expenditures is relevant to the manner in which we analyze aspects of our business relating to discretionary and non-discretionary expenditures. We believe it would be inappropriate to derive our Available Cash before Reserves measure by deducting discretionary maintenance capital expenditures, which we believe are similar in nature in this context to certain other discretionary expenditures, such as growth capital expenditures, distributions/dividends and equity buybacks. Unfortunately, not all maintenance capital expenditures are clearly discretionary or non-discretionary in nature. Therefore, we developed a measure, maintenance capital utilized, that we believe is more useful in the determination of Available Cash before Reserves. Our maintenance capital utilized measure, which is described in more detail below, constitutes a proxy for non-discretionary maintenance capital expenditures and it takes into consideration the relationship among maintenance capital expenditures, operating expenses and depreciation from period to period.

## Maintenance Capital Utilized

We believe our maintenance capital utilized measure is the most useful quarterly maintenance capital requirements measure to use to derive our Available Cash before Reserves measure. We define our maintenance capital utilized measure as that portion of the amount of previously incurred maintenance capital expenditures that we utilize during the relevant quarter, which would be equal to the sum of the maintenance capital expenditures we have incurred for each project/component in prior quarters allocated ratably over the useful lives of those projects/components.

Because we did not initially use our maintenance capital utilized measure, our future maintenance capital utilized calculations will reflect the utilization of solely those maintenance capital expenditures incurred since December 31, 2013.

## Adjusted EBITDA

### *Purposes, Uses and Definition*

Adjusted EBITDA is commonly used as a supplemental financial measure by management and by external users of financial statements such as investors, commercial banks, research analysts and rating agencies, to aid in assessing, among other things:

- (1) the financial performance of our assets without regard to financing methods, capital structures or historical cost basis;
- (2) our operating performance as compared to those of other companies in the midstream energy industry, without regard to financing and capital structure;
- (3) the viability of potential projects, including our cash and overall return on alternative capital investments as compared to those of other companies in the midstream energy industry;
- (4) the ability of our assets to generate cash sufficient to satisfy certain non-discretionary cash requirements, including interest payments and certain maintenance capital requirements; and
- (5) our ability to make certain discretionary payments, such as distributions on our preferred and common units, growth capital expenditures, certain maintenance capital expenditures and early payments of indebtedness.

We define Adjusted EBITDA (“Adjusted EBITDA”) as Net income (loss) attributable to Genesis Energy, L.P. before interest, taxes, depreciation and amortization (including impairment, write-offs, accretion and similar items, often referred to as EBITDA) after eliminating other non-cash revenues, expenses, gains, losses and charges (including any loss on asset dispositions), plus or minus certain other select items that we view as not indicative of our core operating results (collectively, “Select Items”). Although, we do not necessarily consider all of our Select Items to be non-recurring, infrequent or unusual, we believe that an understanding of these Select Items is important to the evaluation of our core operating results. The most significant Select Items in the relevant reporting periods are set forth in this press release.

## Item 9.01. Financial Statements and Exhibits

FOR IMMEDIATE RELEASE

February 17, 2022

## **Genesis Energy, L.P. Reports Fourth Quarter 2021 Results**

HOUSTON – (BUSINESS WIRE) – Genesis Energy, L.P. (NYSE: GEL) today announced its fourth quarter results.

We generated the following financial results for the fourth quarter of 2021:

- Net Loss Attributable to Genesis Energy, L.P. of \$68.3 million for the fourth quarter of 2021 compared to Net Loss Attributable to Genesis Energy, L.P. of \$85.2 million for the same period in 2020.
- Cash Flows from Operating Activities of \$95.6 million for the fourth quarter of 2021 compared to \$1.1 million for the same period in 2020.
- Total Segment Margin of \$155.6 million for the fourth quarter of 2021.
- Available Cash before Reserves to common unitholders of \$51.5 million for the fourth quarter of 2021, which provided 2.80X coverage for the quarterly distribution of \$0.15 per common unit attributable to the fourth quarter.
- We declared cash distributions on our preferred units of \$0.7374 for each preferred unit, which equates to a cash distribution of approximately \$18.7 million and is reflected as a reduction to Available Cash before Reserves to common unitholders.
- Adjusted EBITDA of \$140.7 million in the fourth quarter of 2021.
- Adjusted Consolidated EBITDA of \$594.3 million for the twelve months ended December 31, 2021 and a bank leverage ratio of 4.99X, both calculated in accordance with our senior secured credit agreement and discussed further in this release.

Grant Sims, CEO of Genesis Energy, said, “As we stated at the beginning of the year, 2021 was expected to be a year of transition as our businesses recovered from the impacts of the Covid-19 pandemic and the unprecedented hurricane season of 2020. We did in fact see our businesses begin to recover and our financial performance for 2021 was in line with our expectations.

Importantly, during this transition year, we took steps to significantly enhance the partnership’s financial flexibility to capitalize on the opportunities in front of us. Earlier in the year, we were successful in refinancing our senior secured credit facility and extended its maturity into 2024. In the fourth quarter, we were successful in selling a 36% minority interest in our CHOPS oil pipeline system for gross proceeds of approximately \$418 million. We used these proceeds to pay down debt, and were able to exit the year with a leverage ratio, calculated consistent with our senior secured credit facility, of 4.99 times. Additionally, we exited the year with over \$600 million of undrawn commitments under our senior secured credit facility. This represents ample liquidity for us to capitalize on the economically attractive opportunities in front of us, including the completion of the expansion of our Granger soda ash facility.

As we look forward to 2022, we are very excited about the continuing recovery and the future trajectory of our businesses. While we will go into more detail below, our two largest businesses are expected to meaningfully improve in 2022 as compared to the past several years. Because of the increasingly tight conditions in the world soda ash market, we expect realized prices in 2022 to be at or above those we realized in 2019, or pre-pandemic. This recovery in pricing, in our mind, is at least one year ahead of schedule, based upon our previous expectations and taking into account the caps and collars we have in place for a significant percentage of our sales contracts. We are also excited because we believe that 2022 will be a year of

dramatically increasing volumes out of the deepwater Gulf of Mexico as Kings Quay and Argos begin ramping up production. We expect the contribution from offshore to increase around 10% year over year, even after our sale of a minority interest in CHOPS. As a result, we are rolling out initial guidance for 2022 of total Segment Margin expected in the \$620-\$640 million range and Adjusted EBITDA<sup>(1)</sup> expected in the \$565-\$585 million range. Both preceding ranges reflect zero payments from our legacy CO<sub>2</sub> pipeline business (which totaled \$70 million in 2021), a 64% ownership interest in CHOPS for the entire year and have no add-backs or pro forma adjustments as allowed under our senior secured credit facility to determine covenant compliance and/or pricing thereunder.

I'll quickly turn to our individual segments with a focus on future periods as opposed to spending much time dwelling on the past.

During the quarter, our offshore pipeline transportation segment performed in line with our expectations despite the extended downtime we incurred on our Poseidon oil pipeline as a result of third party onshore facilities being without power for an extended period of time following Hurricane Ida. We believe that our two large upstream developments are now just months away from achieving first production. Both the Argos and Kings Quay floating production systems have been anchored in place in the Gulf of Mexico and both are working to achieve first production soon and anticipate ramping production up to their design capacities of some 80,000 barrels a day and 140,000 barrels a day, respectively, as we move through 2022 and into 2023. Activity levels in and around our assets continue to be exciting in terms of future opportunities to provide midstream services to the upstream community in the Gulf of Mexico. We would expect the midpoint of Segment Margin for our offshore pipeline transportation segment to be approximately \$345 million in 2022, which reflects our sale of a 36% minority interest in CHOPS and also represents a full ten days of hurricane related downtime as opposed to our historical practice of anticipating an average of seven days of interruption.

The demand for soda ash continues to improve through a combination of a recovery in global economic activity along with the various tailwinds associated with the energy transition and its applications for solar panels and lithium batteries. This rapidly increasing demand coupled with, as a practical matter, a net decrease in supply provides a favorable environment for price redetermination for volumes to be sold in 2022. As such, we anticipate our weighted average realized price in 2022, even after taking into account the caps and collars under a significant percentage of our multi-year sales agreements, to actually exceed the weighted average price we realized in 2019, prior to any of the temporary demand destruction associated with the pandemic.

We see nothing on the horizon to significantly alter this higher priced environment. Demand growth with flat supply will always drive prices higher. Additionally, the costs associated with synthetic producers have dramatically increased, both on an absolute and relative basis when compared to natural producers' costs, again providing a constructive backdrop for soda ash prices. Based on this expectation of market conditions, we have made the decision to restart our original Granger production facility and its roughly 500,000 tons of annual production in the first quarter of 2023. The Granger expansion, representing an incremental 700,000 tons or so of annual production remains on schedule and on budget for first production in the third quarter of 2023.

Our legacy refinery services business, which happens to be one of the most, if not in fact the most, eco-friendly methods to deal with sulfur entrained in the crude oil consumed at a refinery, continues to meet our financial performance expectations. It continues to benefit from copper's role in the energy transition, where the majority of our resultant, sulfur removal by-product is used. Our industry leading position in this business combined with our world-class soda ash operations are expected to produce total Sodium Minerals and Sulfur Services Segment Margin in 2022 of approximately \$210 million, at our midpoint.

Market conditions in our marine transportation segment continue to improve. As refinery utilization continues to recover, as heavy/light differentials return to historical norms, and as the effects of net equipment retirements are felt industry wide, we expect utilization rates and spot and term day rates to continue to recover and in fact accelerate as we move through 2022. As a result, we expect the Segment Margin for our marine transportation segment, as we have historically presented it, to be approximately \$50 million at the midpoint of our expectations for 2022.

In our onshore facilities and transportation segment, we completed our exit from the CO<sub>2</sub> pipeline business at the end of 2021. As a result, our 2022 Segment Margin will have no contribution from that exited business, which represented \$70 million in last year's results, given how our exit was structured. We would expect the midpoint of Segment Margin for our onshore facilities and transportation segment to total approximately \$25 million in 2022, which will start out relatively small on a quarterly basis and accelerate through the year as we expect increasing utilization of our assets.

In summary, as we get 2020 and 2021 in our rear view mirror, we remain very excited with the expected improving financial results of our market leading businesses and continue to have a definite line of sight of \$700-\$800 million of annual Adjusted EBITDA in coming years, even after the sale of a minority interest in CHOPS. This outlook highlights the resiliency of our businesses and demonstrates the tremendous operating leverage we have to overall improving market conditions. The

management team and board of directors remain steadfast in our commitment to build long-term value for all of our stakeholders, and we believe the decisions we are making reflect this commitment and our confidence in Genesis moving forward.

I would once again like to recognize our entire workforce for their efforts and unwavering commitment to safe and responsible operations. I'm proud to be associated with each and every one of you."

<sup>(1)</sup> Adjusted EBITDA is a non-GAAP financial measure. We are unable to provide a reconciliation of the forward-looking Adjusted EBITDA contained in this press release to its most directly comparable GAAP financial measure because the information necessary for quantitative reconciliations of Adjusted EBITDA to its most directly comparable GAAP financial measure is not available to us without unreasonable efforts. The probable significance of providing the forward-looking Adjusted EBITDA without directly comparable GAAP financial measure is that such non-GAAP financial measure may be materially different from the corresponding GAAP financial measure.

## Financial Results

### *Segment Margin*

Variations between the fourth quarter of 2021 (the “2021 Quarter”) and the fourth quarter of 2020 (the “2020 Quarter”) in these components are explained below.

Segment Margin results for the 2021 Quarter and 2020 Quarter were as follows:

	Three Months Ended December 31,	
	2021	2020
	<i>(in thousands)</i>	
Offshore pipeline transportation	\$ 74,140	\$ 52,304
Sodium minerals and sulfur services	45,210	40,726
Onshore facilities and transportation	26,312	36,642
Marine transportation	9,972	7,331
Total Segment Margin	<u>\$ 155,634</u>	<u>\$ 137,003</u>

Offshore pipeline transportation Segment Margin for the 2021 Quarter increased \$21.8 million, or 42%, from the 2020 Quarter primarily due to higher overall volumes on our crude oil and natural gas pipeline systems as a result of less unplanned downtime in the 2021 Quarter. During the 2020 Quarter, our offshore pipeline transportation segment experienced continued downtime and interruption from weather events, including Hurricanes Delta and Zeta, as a result of producers shutting in and us taking the necessary safety precautions to remove all personnel from the platforms that we operate and maintain. In addition to the majority of our assets being shut in for approximately 15 days during the 2020 Quarter, our CHOPS pipeline, although not damaged, was out of service beginning on August 26, 2020 (and for the full 2020 Quarter) due to damage at a junction platform that the CHOPS pipeline goes up and over. During the 2020 Quarter, we were able to successfully divert all CHOPS volumes to our 64% owned Poseidon oil pipeline system, but continued to incur our fixed costs associated with the CHOPS pipeline in addition to incremental operating costs we had to incur as a result of regulatory inspections and maintenance to return our assets to service. During the 2021 Quarter, while we did have some effects to our Segment Margin as a result of our Poseidon pipeline being down for part of September as a result of Hurricane Ida and certain onshore delivery constraints (as the distributions we received during the 2021 Quarter relate to business activities from September to November), the impacts were not as significant as those from the 2020 Quarter. The 2021 Quarter included normal activities on our CHOPS pipeline as well as less interruption across our infrastructure relative to the 2020 Quarter. This overall increase in activity was partially offset by our divestiture of a 36% minority interest in CHOPS on November 17, 2021, and thus, 36% of the results of CHOPS were attributable to our noncontrolling interests subsequent to the transaction date.

Sodium minerals and sulfur services Segment Margin for the 2021 Quarter increased \$4.5 million, or 11%. This increase is primarily due to higher NaHS volumes in our refinery services business and more favorable export pricing in our Alkali Business. In our refinery services business, our NaHS sales volumes increased during the 2021 Quarter as demand has continued to recover and return to its pre-pandemic levels over the last twelve months due to the re-opening of economies, specifically from our mining customers in Peru. In our Alkali Business, we continued to produce at a high rate at our Westvaco facility during the 2021 Quarter. Additionally, we saw continued improvements in export pricing in the 2021 Quarter relative to the 2020 Quarter and sequentially from the first nine months of 2021, which is evidence that the supply and demand balance is becoming more aligned.

Onshore facilities and transportation Segment Margin for the 2021 Quarter decreased \$10.3 million, or 28%. This decrease is primarily due to lower cash receipts from Denbury associated with our previously owned NEJD pipeline. On October 30, 2020, we reached an agreement with a subsidiary of Denbury Inc. to transfer to it the ownership of our remaining CO<sub>2</sub> assets, including the NEJD and Free State pipelines, included within our onshore facilities and transportation segment. As a part of the agreement, we received \$22.5 million in cash proceeds for the Free State pipeline (which is included in segment margin during the 2020 Quarter) and we received \$17.5 million in the 2021 Quarter for the remaining principal payment associated with our previously owned NEJD pipeline. Additionally, we had lower contracted minimum volume commitments with our main customer associated with our Baton Rouge corridor assets (including rail, terminal and pipeline) as these commitments stepped down during 2021.

Marine transportation Segment Margin for the 2021 Quarter increased \$2.6 million, or 36%. This increase is primarily attributable to higher utilization in both our inland and offshore barge businesses, partially offset by slightly lower day rates in our inland business during the 2021 Quarter. Lower refinery utilization in the Midwest and Gulf Coast significantly impacted and caused pressure on both the day rates and utilization within our inland barge operation. While we have begun to see slight

improvements, we have continued to enter into short term contracts (less than a year) in both the inland and offshore markets because we believe the day rates currently being offered by the market have yet to fully recover.

#### *Other Components of Net Income*

We recorded Net Loss Attributable to Genesis Energy, L.P. of \$68.3 million in the 2021 Quarter compared to Net Loss Attributable to Genesis Energy, L.P. of \$85.2 million in the 2020 Quarter.

Net Loss Attributable to Genesis Energy, L.P. in the 2021 Quarter was impacted by: (i) higher segment margin of \$18.6 million, relative to the 2020 Quarter (which was inclusive of \$22.5 million associated with cash receipts from the sale of our Free State pipeline and included in the 2020 Quarter's segment margin); (ii) an unrealized (non-cash) gain from the valuation of the embedded derivative associated with our Class A Convertible Preferred Units of \$0.2 million in the 2021 Quarter compared to an unrealized (non-cash) loss of \$18.3 million during the 2020 Quarter recorded within "Other expense, net"; and (iii) lower expense of \$22.0 million as the 2020 Quarter included a loss on sale of assets. These increases were offset by: (i) higher depreciation, depletion and amortization of \$35.7 million in the 2021 Quarter primarily as a result of changes in estimates associated with certain of our non-core asset retirement obligations; (ii) higher general and administrative costs of \$11.2 million during the 2021 Quarter as a result of increased transaction costs associated with our sale of a 36% minority interest in CHOPS; (iii) lower equity in earnings of equity investees of approximately \$10.1 million as a result of lower volumes transported on the Poseidon pipeline during the 2021 Quarter; and (iv) higher interest expense of \$4.9 million during the 2021 Quarter.

#### Earnings Conference Call

We will broadcast our Earnings Conference Call on Thursday, February 17, 2022, at 9:00 a.m. Central time (10:00 a.m. Eastern time). This call can be accessed at [www.genesisenergy.com](http://www.genesisenergy.com). Choose the Investor Relations button. For those unable to attend the live broadcast, a replay will be available beginning approximately one hour after the event and remain available on our website for 30 days. There is no charge to access the event.

Genesis Energy, L.P. is a diversified midstream energy master limited partnership headquartered in Houston, Texas. Genesis' operations include offshore pipeline transportation, sodium minerals and sulfur services, onshore facilities and transportation and marine transportation. Genesis' operations are primarily located in Texas, Louisiana, Arkansas, Mississippi, Alabama, Florida, Wyoming and the Gulf of Mexico.

- (1) Represents transaction costs relating to certain merger, acquisition, divestiture, transition, and financing transactions incurred in advance of the associated transaction.
- (2) Includes the difference in timing of cash receipts from customers during the period and the revenue we recognize in accordance with GAAP on our related contracts. For purposes of our non-GAAP measures, we add those amounts in the period of payment and deduct them in the period in which GAAP recognizes them.
- (3) The 2020 Quarter includes the transaction costs and write-off of the unamortized issuance costs associated with the tender of our 6.00% senior unsecured notes due May 15, 2023 (our "2023 Notes").
- (4) The 2020 Quarter includes the distribution from our Free State pipeline of \$22.5 million, which is defined as an unrestricted subsidiary under our senior secured credit agreement, and is included in our cash flows from investing activities.

**GENESIS ENERGY, L.P.**  
**ADJUSTED DEBT-TO-ADJUSTED CONSOLIDATED EBITDA RATIO - UNAUDITED**

(in thousands)

	December 31, 2021
Senior secured credit facility	\$ 49,000
Senior unsecured notes, net of debt issuance costs	2,930,505
Less: Outstanding inventory financing sublimit borrowings	(9,700)
Less: Cash and cash equivalents	(5,090)
Adjusted Debt <sup>(1)</sup>	<u>\$ 2,964,715</u>
	Pro Forma LTM
	December 31, 2021
Consolidated EBITDA (per our senior secured credit facility)	\$ 576,229
Consolidated EBITDA adjustments <sup>(2)</sup>	18,043
Adjusted Consolidated EBITDA (per our senior secured credit facility) <sup>(3)</sup>	<u>\$ 594,272</u>
Adjusted Debt-to-Adjusted Consolidated EBITDA	4.99X

- (1) We define Adjusted Debt as the amounts outstanding under our senior secured credit facility and senior unsecured notes (including any unamortized premiums, discounts, or issuance costs) less the amount outstanding under our inventory financing sublimit, and less cash and cash equivalents on hand at the end of the period from our restricted subsidiaries.
- (2) This amount reflects adjustments we are permitted to make under our senior secured credit facility for purposes of calculating compliance with our leverage ratio. It includes a pro rata portion of projected future annual EBITDA of approximately \$39 million associated with material organic growth projects, which is calculated based on the percentage of capital expenditures incurred to date relative to the expected budget multiplied by the total annual contractual minimum cash commitments we expect to receive as a result of the project. Additionally, it includes the pro forma adjustments to Adjusted Consolidated EBITDA (using historical amounts in the test period) associated with our sale of a 36% interest in CHOPS. This adjustment may not be indicative of future results.
- (3) Adjusted Consolidated EBITDA for the four-quarter period ending with the most recent quarter, as calculated under our senior secured credit facility.

This press release includes forward-looking statements as defined under federal law. Although we believe that our expectations are based upon reasonable assumptions, we can give no assurance that our goals will be achieved. Actual results may vary materially. All statements, other than statements of historical facts, included in this press release that address activities, events or developments that we expect, believe or anticipate will or may occur in the future, including but not limited to statements relating to future financial and operating results and compliance with our credit facility covenants, the timing and anticipated benefits of the Kings Quay and Argos developments, our expectations regarding our Granger expansion, the expected performance of our other projects and business segments and the potential impact of the Covid-19 pandemic, and our strategy and plans, are forward-looking statements, and historical performance is not necessarily indicative of future performance. Those forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties, factors and risks, many of which are outside our control, that could cause results to differ materially from those expected by management. Such risks and uncertainties include, but are not limited to, weather, political, economic and market conditions, including a decline in the price and market demand for products (which may be affected by the actions of OPEC and other oil exporting nations) and a reduction in demand for our services resulting in further impairments of our assets, the continued spread of disease (including Covid-19), the timing and success of business development efforts and other uncertainties, and the realized benefits of the preferred equity investment in Alkali Holdings Company, LLC by affiliates of Blackstone Alternative Credit Advisors LP or our ability to comply with the Granger transaction agreements and maintain control and ownership of our Alkali Business. Those and other applicable uncertainties, factors and risks that may affect those forward-looking statements are described more fully in our Annual Report on Form 10-K for the year ended December 31, 2020 filed with the Securities and Exchange Commission and other filings, including our Current Reports on Form 8-K and Quarterly Reports on Form 10-Q. We undertake no obligation to publicly update or revise any forward-looking statement.

## NON-GAAP MEASURES

This press release and the accompanying schedules include non-generally accepted accounting principle (non-GAAP) financial measures of Adjusted EBITDA and total Available Cash before Reserves. In this press release, we also present total Segment Margin as if it were a non-GAAP measure. Our non-GAAP measures may not be comparable to similarly titled measures of other companies because such measures may include or exclude other specified items. The accompanying schedules provide reconciliations of these non-GAAP financial measures to their most directly comparable financial measures calculated in accordance with generally accepted accounting principles in the United States of America (GAAP). Our non-GAAP financial measures should not be considered (i) as alternatives to GAAP measures of liquidity or financial performance or (ii) as being singularly important in any particular context; they should be considered in a broad context with other quantitative and qualitative information. Our Available Cash before Reserves, Adjusted EBITDA and total Segment Margin measures are just three of the relevant data points considered from time to time.

When evaluating our performance and making decisions regarding our future direction and actions (including making discretionary payments, such as quarterly distributions) our board of directors and management team have access to a wide range of historical and forecasted qualitative and quantitative information, such as our financial statements; operational information; various non-GAAP measures; internal forecasts; credit metrics; analyst opinions; performance, liquidity and similar measures; income; cash flow; and expectations for us, and certain information regarding some of our peers. Additionally, our board of directors and management team analyze, and place different weight on, various factors from time to time. We believe that investors benefit from having access to the same financial measures being utilized by management, lenders, analysts and other market participants. We attempt to provide adequate information to allow each individual investor and other external user to reach her/his own conclusions regarding our actions without providing so much information as to overwhelm or confuse such investor or other external user.

## AVAILABLE CASH BEFORE RESERVES

### *Purposes, Uses and Definition*

Available Cash before Reserves, also referred to as distributable cash flow, is a quantitative standard used throughout the investment community with respect to publicly traded partnerships and is commonly used as a supplemental financial measure by management and by external users of financial statements such as investors, commercial banks, research analysts and rating agencies, to aid in assessing, among other things:

- (1) the financial performance of our assets;
- (2) our operating performance;
- (3) the viability of potential projects, including our cash and overall return on alternative capital investments as compared to those of other companies in the midstream energy industry;
- (4) the ability of our assets to generate cash sufficient to satisfy certain non-discretionary cash requirements, including interest payments and certain maintenance capital requirements; and
- (5) our ability to make certain discretionary payments, such as distributions on our preferred and common units, growth capital expenditures, certain maintenance capital expenditures and early payments of indebtedness.

We define Available Cash before Reserves (“Available Cash before Reserves”) as Adjusted EBITDA as adjusted for certain items, the most significant of which in the relevant reporting periods have been the sum of maintenance capital utilized, net cash interest expense, cash tax expense, and cash distributions paid to our Class A convertible preferred unitholders.

### *Disclosure Format Relating to Maintenance Capital*

We use a modified format relating to maintenance capital requirements because our maintenance capital expenditures vary materially in nature (discretionary vs. non-discretionary), timing and amount from time to time. We believe that, without such modified disclosure, such changes in our maintenance capital expenditures could be confusing and potentially misleading to users of our financial information, particularly in the context of the nature and purposes of our Available Cash before Reserves measure. Our modified disclosure format provides those users with information in the form of our maintenance capital utilized measure (which we deduct to arrive at Available Cash before Reserves). Our maintenance capital utilized measure constitutes a proxy for non-discretionary maintenance capital expenditures and it takes into consideration the relationship among maintenance capital expenditures, operating expenses and depreciation from period to period.

### **Maintenance Capital Expenditures**

Maintenance capital expenditures are capitalized costs that are necessary to maintain the service capability of our existing assets, including the replacement of any system component or equipment which is worn out or obsolete. Maintenance capital expenditures can be discretionary or non-discretionary, depending on the facts and circumstances.

Initially, substantially all of our maintenance capital expenditures were (a) related to our pipeline assets and similar infrastructure, (b) non-discretionary in nature and (c) immaterial in amount as compared to our Available Cash before Reserves measure. Those historical expenditures were non-discretionary (or mandatory) in nature because we had very little (if any) discretion as to whether or when we incurred them. We had to incur them in order to continue to operate the related pipelines in a safe and reliable manner and consistently with past practices. If we had not made those expenditures, we would not have been able to continue to operate all or portions of those pipelines, which would not have been economically feasible. An example of a non-discretionary (or mandatory) maintenance capital expenditure would be replacing a segment of an old pipeline because one can no longer operate that pipeline safely, legally and/or economically in the absence of such replacement.

As we exist today, a substantial amount of our maintenance capital expenditures from time to time will be (a) related to our assets other than pipelines, such as our marine vessels, trucks and similar assets, (b) discretionary in nature and (c) potentially material in amount as compared to our Available Cash before Reserves measure. Those expenditures will be discretionary (or non-mandatory) in nature because we will have significant discretion as to whether or when we incur them. We will not be forced to incur them in order to continue to operate the related assets in a safe and reliable manner. If we chose not make those expenditures, we would be able to continue to operate those assets economically, although in lieu of maintenance capital expenditures, we would incur increased operating expenses, including maintenance expenses. An example of a discretionary (or non-mandatory) maintenance capital expenditure would be replacing an older marine vessel with a new marine vessel with substantially similar specifications, even though one could continue to economically operate the older vessel in spite of its increasing maintenance and other operating expenses.

In summary, as we continue to expand certain non-pipeline portions of our business, we are experiencing changes in the nature (discretionary vs. non-discretionary), timing and amount of our maintenance capital expenditures that merit a more detailed review and analysis than was required historically. Management's recently increasing ability to determine if and when to incur certain maintenance capital expenditures is relevant to the manner in which we analyze aspects of our business relating to discretionary and non-discretionary expenditures. We believe it would be inappropriate to derive our Available Cash before Reserves measure by deducting discretionary maintenance capital expenditures, which we believe are similar in nature in this context to certain other discretionary expenditures, such as growth capital expenditures, distributions/dividends and equity buybacks. Unfortunately, not all maintenance capital expenditures are clearly discretionary or non-discretionary in nature. Therefore, we developed a measure, maintenance capital utilized, that we believe is more useful in the determination of Available Cash before Reserves. Our maintenance capital utilized measure, which is described in more detail below, constitutes a proxy for non-discretionary maintenance capital expenditures and it takes into consideration the relationship among maintenance capital expenditures, operating expenses and depreciation from period to period.

### **Maintenance Capital Utilized**

We believe our maintenance capital utilized measure is the most useful quarterly maintenance capital requirements measure to use to derive our Available Cash before Reserves measure. We define our maintenance capital utilized measure as that portion of the amount of previously incurred maintenance capital expenditures that we utilize during the relevant quarter, which would be equal to the sum of the maintenance capital expenditures we have incurred for each project/component in prior quarters allocated ratably over the useful lives of those projects/components.

Because we did not initially use our maintenance capital utilized measure, our future maintenance capital utilized calculations will reflect the utilization of solely those maintenance capital expenditures incurred since December 31, 2013.

## ADJUSTED EBITDA

### *Purposes, Uses and Definition*

Adjusted EBITDA is commonly used as a supplemental financial measure by management and by external users of financial statements such as investors, commercial banks, research analysts and rating agencies, to aid in assessing, among other things:

- (1) the financial performance of our assets without regard to financing methods, capital structures or historical cost basis;
- (2) our operating performance as compared to those of other companies in the midstream energy industry, without regard to financing and capital structure;
- (3) the viability of potential projects, including our cash and overall return on alternative capital investments as compared to those of other companies in the midstream energy industry;
- (4) the ability of our assets to generate cash sufficient to satisfy certain non-discretionary cash requirements, including interest payments and certain maintenance capital requirements; and
- (5) our ability to make certain discretionary payments, such as distributions on our preferred and common units, growth capital expenditures, certain maintenance capital expenditures and early payments of indebtedness.

We define Adjusted EBITDA (“Adjusted EBITDA”) as Net income (loss) attributable to Genesis Energy, L.P. before interest, taxes, depreciation and amortization (including impairment, write-offs, accretion and similar items, often referred to as EBITDA) after eliminating other non-cash revenues, expenses, gains, losses and charges (including any loss on asset dispositions), plus or minus certain other select items that we view as not indicative of our core operating results (collectively, “Select Items”). Although, we do not necessarily consider all of our Select Items to be non-recurring, infrequent or unusual, we believe that an understanding of these Select Items is important to the evaluation of our core operating results. The most significant Select Items in the relevant reporting periods are set forth below.

The table below includes the Select Items discussed above as applicable to the reconciliation of Net income (loss) attributable to Genesis Energy, L.P. to Adjusted EBITDA and Available Cash before Reserves:

	Three Months Ended December 31,	
	2021	2020
<b>I. Applicable to all Non-GAAP Measures</b>		
Differences in timing of cash receipts for certain contractual arrangements <sup>(1)</sup>	\$ 8,080	\$ 11,668
Distributions from unrestricted subsidiaries not included in income <sup>(2)</sup>	17,500	21,870
Certain non-cash items:		
Unrealized losses (gains) on derivative transactions excluding fair value hedges, net of changes in inventory value <sup>(3)</sup>	(29)	20,855
Loss on debt extinguishment <sup>(4)</sup>	—	8,250
Adjustment regarding equity investees <sup>(5)</sup>	2,517	2,542
Other	335	1,481
Sub-total Select Items, net <sup>(6)</sup>	<u>28,403</u>	<u>66,666</u>
<b>II. Applicable only to Adjusted EBITDA and Available Cash before Reserves</b>		
Certain transaction costs <sup>(7)</sup>	7,308	861
Other	612	14
Total Select Items, net <sup>(8)</sup>	<u>\$ 36,323</u>	<u>\$ 67,541</u>

- (1) Includes the difference in timing of cash receipts from customers during the period and the revenue we recognize in accordance with GAAP on our related contracts. For purposes of our non-GAAP measures, we add those amounts in the period of payment and deduct them in the period in which GAAP recognizes them.

- (2) The 2021 Quarter includes \$17.5 million in cash receipts associated with principal repayments on our previously owned NEJD pipeline not included in income, and the 2020 Quarter includes \$22.5 million in cash receipts received from our previously owned Free State pipeline not included in income. Both the Free State pipeline and NEJD are defined as unrestricted subsidiaries under our senior secured credit agreement.
- (3) The 2021 Quarter includes a \$0.2 million unrealized gain from the valuation of the embedded derivative associated with our Class A convertible preferred units and the 2020 Quarter includes a \$18.3 million unrealized loss from the valuation of the embedded derivative.
- (4) The 2020 Quarter includes the transaction costs and write-off of the unamortized issuance costs associated with the tender our 2023 Notes.
- (5) Represents the net effect of adding distributions from equity investees and deducting earnings of equity investees net to us.
- (6) Represents all Select Items applicable to Segment Margin and Available Cash before Reserves.
- (7) Represents transaction costs relating to certain merger, acquisition, divestiture, transition, and financing transactions incurred in advance of the associated transaction.
- (8) Represents Select Items applicable to Adjusted EBITDA and Available Cash before Reserves.

## SEGMENT MARGIN

Our chief operating decision maker (our Chief Executive Officer) evaluates segment performance based on a variety of measures including Segment Margin, segment volumes where relevant and capital investment. We define Segment Margin (“Segment Margin”) as revenues less product costs, operating expenses, and segment general and administrative expenses (all of which are net of the effects of our noncontrolling interest holders), plus or minus applicable Select Items, and eliminating any gain or loss on sale of assets. Although, we do not necessarily consider all of our Select Items to be non-recurring, infrequent or unusual, we believe that an understanding of these Select Items is important to the evaluation of our core operating results.
