Re: **Genesis Alkali Sodium Sesquicarbonate BSE-TSE Free**

Dear Valued Customer:

This letter is to confirm that the manufacture of Genesis sodium sesquicarbonate (all grades) are based on the refining of trona ore, a naturally occurring mineral, and does not contain any bovine products or animal derivatives as part of its origin or processing. The processing equipment and packaging materials which are used for manufacturing, or packaging are exclusively used to produce Genesis sodium alkali products and do not come into contact with animal derived products. Therefore, this product would not be at risk for carrying transmissible spongiform encephalopathy (TSE) or Bovine Spongiform Encephalopathy (BSE) materials.

This guarantee continues with the product only as long as the product remains in the original unopened container from the Genesis Alkali plant in Green River, Wyoming.

Please contact me if you have any questions.

Sincerely,

Michael Kemmerer  
Regulatory/QA Manager
